

For those who are just learning about o-mok-see: all events are run in 30 foot lanes, with four lanes in the arena. At the end of the lane is the turning line. Almost every event has at least one property positioned on the turning line. In other events, any exchanges must take place behind the turning line. Any time the word "property" is used, it refers to any item used during an o-mok-see event, for example, barrels, poles, flags, are all "properties."

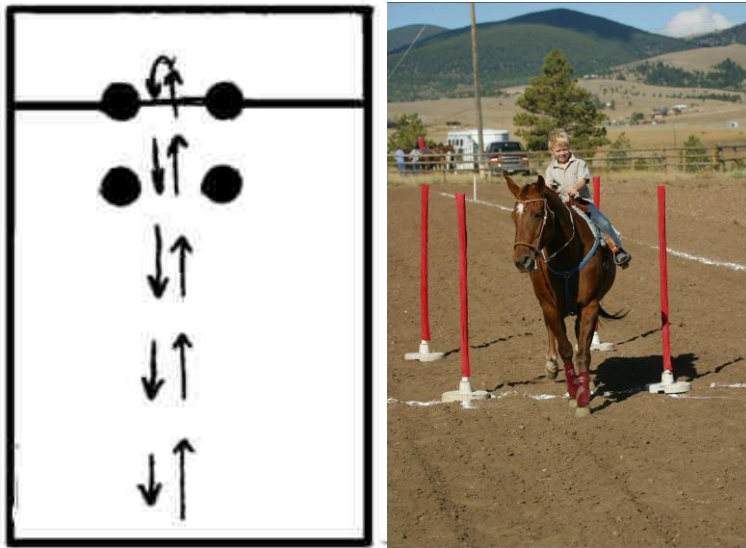

1

**POLE BENDING** (*All Ages*). Each contestant shall have a line of six poles, five feet high, 1 to 2 inches in diameter and painted white. All lanes to have uniform poles set 21 feet apart. Last pole to be centered on turning line. Contestant races to pole on the turning line, makes a left or right turn, bends through and back, weaving poles, then races back across finish line. Disqualification for knocking over a pole or touching pole with hand.

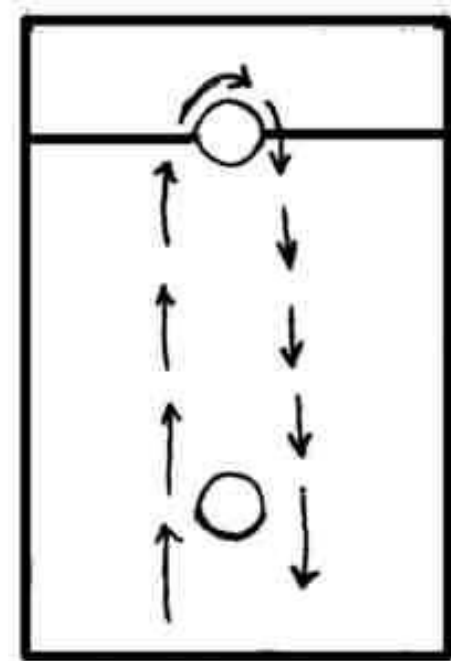

2

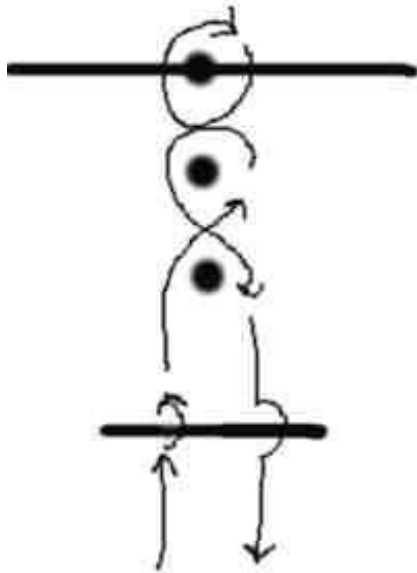

**KEY RACE** (*All Ages*). Two pole bending stakes on the turning line five feet apart. Between the starting line and turning line there are two more stakes ten feet from the turning line and five feet apart. These stakes to be in line with stakes on the turning line. All stakes to be covered with 4"×5' red canvas socks. Contestant races between stakes, across turning line, turns and reverses course back between the stakes to finish line. Contestant is disqualified for knocking over any stakes.

**MSCA FLAG RACE** (*All Ages*). Buckets of sand are centered on 30-gallon barrels. One barrel placed on turning line, the other 30 feet from the starting line. Three white flags in first bucket and three red flags in bucket at turning line. Contestant passes first barrel, picks up a white flag, races to turning line, exchanges white flag for a red flag. Continues until three red flags are in the first bucket, and three white flags are in the bucket at the turning line. Time ends when contestant crosses finish line. Flags will be 9 inches square with sticks 5/8 inches in diameter and 18 inches long with pointed end. Buckets to be approximately 12 inches high and 12–14 inches in diameter. .

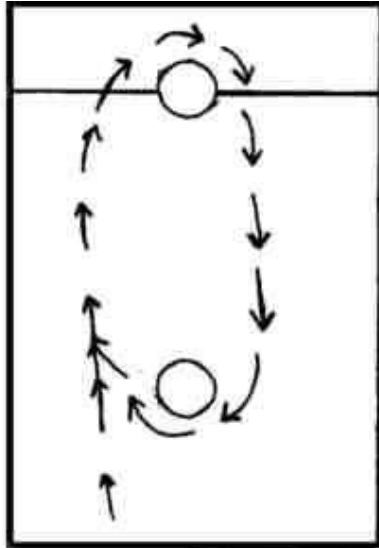

**WESTERN JUMPING** (*All Ages*). A plastic pole 15 feet in length 3 inches in diameter is set on standards a minimum of 12 inches and a maximum of 18 inches off the ground and centered 60 feet from the starting line. Standards to be placed at each end of the pole. Three stakes—the first placed on the turning line with the others set 21 feet apart toward the starting line. Contestant races to the pole, jumps the pole, weaves through the stakes both ways, either left or right, returns to jump the pole, and crosses the finish line. Disqualifications for steadying a pole with hand or knocking down a property.

**FIGURE EIGHT BARRELS** (*All Ages*). A barrel is centered on the turning line and another barrel is set 75 feet toward the starting line in the center of the lane. Contestant is mounted, races to turning line, makes a left or right turn around the barrel, races to the second barrel, making the opposite turn around the second barrel, returns to first barrel on turning line and makes another left or right turn (same as first turn) and races to finish line. Contestant is disqualified for breaking the pattern or knocking over a barrel.

**BARREL & STAKE RACE** (*under 8, 8–11*). Rider races to barrel placed 30 feet from starting line, containing one stake for Under 8 or two stakes for 8–11, and 3 stakes 12 & up, picks up one stake and deposits stake in second barrel on turning line, continuing until all stakes are placed in second barrel, and races back across finish line. Rider must keep barrel to right or left at all times. Hitting horse with stake disqualifies rider. Wooden or plastic stakes 5 feet long, full round 1 to 2 inches in diameter, of a light weight, and thirty (30) gallon barrels painted white to be used. All stakes used in the event must be of the same size and material. Contestants are disqualified for knocking over a barrel or dropping a stake outside of a barrel. If a contestant accepts the position of the stakes after the contestant has them positioned, and a stake falls out of the barrel after the ready light is on, they will be disqualified.

**TWO BARREL POLE RACE** (*All Ages*). Two barrels are placed 60 feet from starting line, 10 feet between the barrels (all measurements made to the center of barrel) and 10 feet from each barrel to lane divider lines. Three pole bending poles, the first placed in the center of the lane on the turning line, and the other two poles 21 feet apart toward starting line. Contestant races to either barrel, making a right or left turn around the first barrel, then the opposite turn around the second barrel, weaves poles both ways, then races back between barrels to finish line.

**EGG RACE.** Contestant races to turning line where a spoon and an egg are placed on the ground. Rider dismounts, picks up egg with spoon, holding spoon by handle. Rider mounts with egg in spoon and returns across finish line, holding spoon far enough out on handle so judges can see that no finger or thumb touches egg. Fresh eggs are to be used.

**LAZY EGG RACE.** Contestants mounted, have egg in spoon of uniform size at starting line. Contestant races to the turning line, makes a turn around a 30-gallon barrel placed on turning line. Races across finish line. Contestant must hold spoon far enough out on handle so judges can see that no fingers or thumb touches the egg. Fresh eggs to be used. Dropping egg disqualifies contestant.
